

## The new ERCO Lichtbericht: Heroes behind the scenes

### A glimpse behind the curtains of art institutions

They are rarely in the spotlight, but nothing happens in the art world without them: These are the people who manage technology, advise on lighting choices, maintain systems, ensure seamless operations and ultimately illuminate artworks with expert skill and sensitivity. In this edition of Lichtbericht magazine, ERCO shines a light on those who keep the world's museums and galleries running smoothly: Technicians, dealers, organisational talents, conservators, exhibition creators and consulting planners.

From Paris to Boston to Tasmania: ERCO has met the 'heroes behind the scenes' at exhibition venues around the globe. What role does lighting play in their daily work? How do logistics and planning come together for a lighting project? What challenges do temporary exhibitions or LED upgrades present, and how do you integrate modern lighting technology into historic, protected architecture?

These and many other topics are explored in the new Lichtbericht, featuring captivating projects from around the world. The experiences and insights shared by our interviewees are as diverse as their biographies and their approaches to lighting art. What unites them is a shared passion for art and light.

Lichtbericht 104

#### Heroes in the background

They are rarely in the spotlight, but nothing happens in the art world without them: those people who organise exhibitions, manage the technology, maintain lighting systems and illuminate artworks with a great deal of expertise and sensitivity. We have visited them – in museums and galleries all over the world.

## About ERCO

ERCO is an international specialist for high-quality and digital architectural lighting. The family-owned company, founded in 1934, operates globally in 55 countries with independent sales organisations and partners.

ERCO understands light as the fourth dimension of architecture – and thus as an integral part of sustainable building. Light is the contribution to making society and architecture better and, at the same time, preserving our environment. ERCO Greenology® – the corporate strategy for sustainable lighting – combines ecological responsibility with technological expertise.

At the light factory in Lüdenscheid, Germany, ERCO develops, designs and manufactures

luminaires with a focus on photometric optics, electronics and sustainable design. The lighting tools are developed in close collaboration with architects, lighting designers and electrical designers. They are used primarily in the following applications: Work and Culture, Community and Public/Outdoor, Contemplation, Living, Shop and Hospitality. ERCO lighting experts support designers worldwide in transforming their projects into reality with highly precise, efficient and sustainable lighting solutions.
