OKALUX FOR SCHOOLS

A Daylighting Solution for Learning Environments

OKALUX

Light Diffusing Insulating Glass for Zero Glare

OKALUX integrates a translucent light diffusing capillary slab covered in glass fiber tissue within a standard insulated glass unit resulting in

- Optimum transmission of light into the interior space, regardless of external solar conditions
- Customizable solar heat gain, light transmission values, U-Value
- Glare protection and privacy
- Bird friendly (threat level 25)
- Colorfast, does not fade or discolor after long term exposure to UV light
- Perfect solution for classrooms, gymnasiums, stairwells, gymnatoriums
- U-Values as low as .09 BTU
- Solar Heat Gain Coefficient (SHGC) as low as 15%
- Active Shooter Specifications available
- Made in Syracuse, New York
