

**ISOSKLO joins as a new partner:  
SANCO expands in the Czech Republic**

**Ulm, March 2025.** *The SANCO Group continues to expand: with glass manufacturer ISOSKLO, SANCO welcomes its fourth partner company in the Czech Republic, further strengthening its position as Europe's largest alliance of insulating glass manufacturers.*

Located approximately 100 kilometres south of Prague, ISOSKLO is part of the Austrian family-owned company ISOTHERM, which has been active in the Czech Republic since 1994 and operates two additional glass processing plants in the country. With around 90 employees, ISOSKLO is one of the leading glass processors, offering a wide range of glass solutions for both façades and interior spaces. The company places a strong emphasis on project-based business and consulting services for architects and façade installers. A particular speciality of ISOSKLO is jumbo glass, which can be processed in sizes of up to 7.5 x 3.21 metres and a total weight of up to two tons.

'We are delighted to welcome ISOSKLO into the SANCO family and are confident that this partnership will give us additional momentum in a stable market environment,' says Managing Director Daniel Schmidinger. The main reasons for joining include the assurance of a reliable supply of high-quality base glass, support with certifications and test reports, and the group's Europe-wide marketing strategy. Schmidinger also values the close professional exchange with colleagues and employees across the SANCO network.

Antonio Gioello, Head of SANCO Consulting, also welcomes the expansion of the group: 'The SANCO brand stands for the highest quality and reliability across Europe. We are pleased to see this reflected in the growth of our partner companies,' says Gioello, adding: 'With ISOSKLO, we have gained a highly capable company that is an excellent fit for our network'.

**About SANCO:**

With over 60 active members in 14 countries, SANCO is the largest alliance of insulating glass manufacturers in Europe. The Swiss-based Glas Trösch Group is the licensor. The product range manufactured by SANCO partners includes energy-efficient insulating glass for windows and façades, as well as sophisticated glass solutions for interior spaces.
